FOR IMMEDIATE RELEASE

“Are We Dying For Capitalism?”

KSQD 90.7, 89.5 & 89.7FM “Be Bold America!”

Sunday, December 3, 2023 at 5:00pm (PT)

We are dying—literally—from capitalism, and if our species is to survive we need a new abolitionist movement whose goal is to overturn capitalism and replace it with policies and politics that are **designed to meet the needs of the many, instead of the bottom lines of the few.**

A triangle of extinction ... capitalism, environmental destruction, and war, are creating an emergency that humanity-as-a-whole has **never faced before.**

Interview guest, **Dr. Charles Derber**, will tell us **how runaway capitalism has brought us to the brink of extinction**, trace the history of how the U.S. became the leading capitalist power, and chart a way to a more hopeful future.

Noam Chomsky states: *“Dying for Capitalism is carefully reasoned and informed, spelling out what we can and must do, without delay.”*

Interview Guest:

Dr. Charles Derber is Professor of Sociology at Boston College and has **written 26 books** - on politics, democracy, fascism, corporations, capitalism, climate change, war, the culture wars, culture and conversation, and social change.

He writes for and has been reviewed in the **NY Times, the Washington Post, the Boston Globe, Truthout, and other leading media**. His books are translated into 14 languages and his most recent books include *Dying for Capitalism*, *Welcome to the Revolution*, *Moving Beyond Fear*, *Sociopathic Society: A People's Sociology of the United States*; *Capitalism: Should You Buy It?*

Guest Cohost:

Richard Nolthenius, Ph.D. is a member of the **Earth Futures Institute** with specialty in economics, at UC Santa Cruz, and is also Chair of the **Astronomy Department at Cabrillo College** in Santa Cruz, CA. Since 2009 Richard has shifted his focus to climate science and the human poly-crisis, and teaches a comprehensive course on **climate change and its civilization context**. **By following the crisis' threads, he finds no solution is possible which neglects the deep causes for human behavior, in virtually all areas. It's not just a techno problem.**

Richard is a contributing chapter author in *Climate Abandoned: We're on the Endangered Species List*, a #1 Amazon bestseller.
